

## **Topic Name**

### **Spring Frameworks**

#### **Introduction and IOC**

#### **Dependency Injection**

#### **Autowiring + bean life cycle**

#### **Dependency checking**

#### **depends-on Required**

what is bean and scope of bean

what is @component scan,@ configuration

which annotation u have to used in spring

What is Spring?

Which annotations you use in spring

what is @controller

Why we use @componentscan and @qualifier

Advantages of spring

Spring IOC container

Autowiring concept

What is the difference between @Service and @ Component?

Spring – When creating object by default what is the scope of the object

Dependency checking?types

Dependency injection

What is @Autowired, @ComponentScan, @controller?

Bean life cycle

@ component scan

Default type of scope

What is scope

Scope of bean class

Another name for dependency injection

What types of filters we use

what is returned type of action result

What is spring bean scope

How spring create object? - on what bases spring create class for object

If spring bean object not found then it will throw which exception

difference bet spring and spring bean

IOC with Bean

How to create bean in Spring in application context

dependancy injection

What is IOC

Write Join Query in MySQL

primary key and foreign key

Dependency Injection ? and How it Works?

Types of dependancy injection

Modules of Spring framework

How spring is light weight

Difference between Autowiring and dependency injection

Advantages of spring

How dependency injection works

What is ioc what it do.

Can we use both setters base and constructor base injection & in this situation which will work

what is application context

what is circular dependancy exception

What is Dependancy injection and inversion of control in spring?

Explain Spring bean life cycle?

What are the different types of IOC container? difference between them?

What is bean ? What are the tags ?

Real time example of dependency injection ?

singleton is default scope and inner bean is prototype then how many object is created

init() and destroy() of bean scenario ?

What is application level events in spring ?

i have inject one class to another how can i inject

Scope of bean, which is default
