

## **Topic Name-**

### **Hibernate**

what is hbm2ddl in hibernate.cfg.xml

what is dialect in hibernate.cfg.xml

Which annotations you use in hibernate

@query Annotations

Connections with hibernate (all steps)

What is different cases of mapping and where we should make the change in code

What is cascade used for

Core interface of Hibernate

Difference Get vs load

What is Hibernate

What is use of lazy loading

Why we use Sessionfactory

How many types of mapping in Hibernate

States of Hibernate

What is Hibernate Mapping? Explain OneToOne mapping?

What is Lazy and Eager loading?

@ primary annotation

What is Hibernate and why we use that, Hibernate Mapping

Hibernate session management

Object state in hibernate

Get and load method in Hibernate

Hibernate configuration and annotations

Hibernate architecture?

@transctional

@transient

annotation in hibernate

What is the difference between execute , execute query and execute update?

What is session and session factory?

Default hibernate Cache

Hibernate and JPA

Hibernate Cache level

How to create primary key in hibernate

How to create Composite key in hibernate

Annotations used in hibernate program?

How you configure Hibernate?

Hibernate annotation

Session Factory

Transaction in hibernate

How create primary key in hibernate

Session and session factory

Why to use hibernate

Hibernate features

How you come to know the application of POJO class in Hibernate

Cache mechanism types

One to one mapping

how we configure the hibernate into the spring boot project

Diff between jpa & hibernate

why use hibernate?

What is the save and persist method?

Hibernate annotations

explain mapping in hibernate and why we use it

types of cache

diff. bet. get and load

how to enable 2nd level cache

explain lazy loading

what is hibernate

Mapping of hibernate

what is custom exception in hibernate

what is orm tools

Difference between Jpa & Hibernate

how u handle sessions in project

session management in project

cookies

One to many mapping

difference betn get and load method

what is cascade and fetch type like something

scenario on inheritance mapping of hibernate

which mapping is suitable for student and subject relation && employee and department

Diff early and lazy instantiated

Lazy loading

Hibernate annotations?

What is hql

@transaction

What is constrain

How to declare values in under entity tag

What's are JPA and Hibernate?

One to many mapping

How to create hibernate entity

Life cycle of Hibernate

How to insert data into database Stp By Step Using hibernate(With Annotation & Without Annotation)

(With Annotation & Without Annotation)

how to implements joins in hibernate

collection type in hibernate

how to create immutable class in hibernate

What is difference between JDBC and hibernate

How you use database connectivity using hibernate

What is Inheritance association

Difference between 1st n 2nd cache in hibernate

How many DB available in dialects

Difference between save and persist , get and load , save and saveOrUpdate

What is session factory and session

What is dirty checking in hibernate

Hibernate Session and SessionFactory?

How can u use second level cache?

Difference between save and save&update, get & load?

What is Has-A relationship?

What is Hibernate.cfg file contains.

What is association?

What is dielect? How it works?

What is criteria query?

How we can do one to many mapping in program ?

Why we use hibernate over JDBC.

How you define pojo class

In many to many mapping, how many tables are created.

Scope of maven

One to many used for department and employees

how to call static page in servlet ?

diff betn native query and named query ?

life cycle of Hibernate?

how many types of cache in java

which is by default cache

default cache is called level one or level two?

association and aggregation

when level2 is executed?

Whrere included hibernateajax?

Explain HSQ.

What are the databases which support HQL.

Connections with hibernate (all steps)

What is Lazy and Eager loading?

What is different cases of mapping and where we should make the change in code

types of cache layer

How you work on inheritance in hibernate

difference between put and patch method

what is hibernate configuration file
