Java 1.8 Features

what is predicate

java 8 features

explain any 3 points from java 8

why they added the scope for default method in interface

Explain the feature Stream API in Java8.

What is functional interface

What is lambda expression

default method

what is date class in java?

Return type of functional interface

Functional interface and lambda experiation

java 8 code of get even numbers

In functional interface is it mandatory to use @functionalInterface

java 8 bipredicate

abstarct class and functional interface

stream methods

Lambda function, stream API of even number

Lambda function, stream API for sorting char

How to use map in lamba function

for each loop

How will you use Comparator without any lambda expression. What are the other alternatives to lamba expression?

difference between predicate and function?

filter() vs map()

Java 8 features

why lambda function come into picture

features of java 8,9

Feature of java8 (Explain features and write code)

Write lamba exception syntax

can we write multiple Abstract method in functional interface?

What is functional interface, is it necessary to use @functional annotation, wt will happen if dont used this annotation

write one method using lambada expression

Difference between Functional programming & oops programming

What is the purpose of default method of interface

what is threshold is decided in java 8 for internal working of hashmap for internal structure of linked list

what is the enhancement for hash map internal structure in java 8

What is date and time Api and explain?

optional in java 8

what is try with resources.

Write a program for addition with java8 feature?

what is functional interface and its practical use?

what is default method and uses?

Sort list using java 8 feature

difference bet filter, map and reduce method and write the example for the same

If my functional interface implementing other interface, will be a functional?

How to call a default method

Method reference?

difference between interface and functional interface

How to use Optional class
